control in the palm  
of your hand.

## Nupro Freedom™

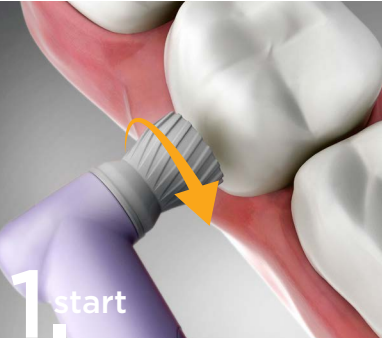

Cordless Prophy System with SmartMode™ Technology

THE DENTAL  
SOLUTIONS  
COMPANY™

 Dentsply  
Sirona

# Your cordless prophy system just got smarter.

How does SmartMode™ work?

1 start  
cup starts spinning at 500rpm upon activation

2 polish  
cup speed increases as you press against the tooth with maximum speed of 3000rpm; reduce and increase speed as you wish with less or more pressure

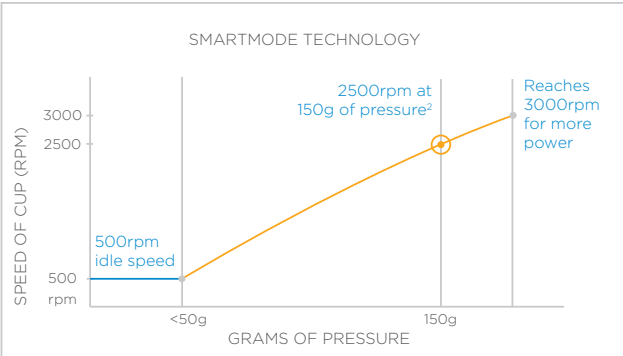

3 remove  
cup speed decreases automatically as it pulls away from the tooth

## Introducing the only cordless prophy system with SmartMode™ Technology.

Nupro Freedom's revolutionary SmartMode™ Technology allows you to control the prophy angle speed automatically by using pressure against the tooth, eliminating the need for a foot pedal.

### Faster

Nupro Freedom™ has the speed and power hygienists need for polishing procedures.

### Better

- Lightweight, cordless design
- No need for a foot pedal (optional)
- 25% more speed and power<sup>1</sup>
- All-day battery life with rapid 15-minute recharge
- Quieter than air-driven hygiene or low-speed handpieces

### Safer

## Protect your patients from the risk of infection.

The CDC sterilization guidelines state:

Dental handpieces and associated attachments, including low-speed motors and reusable prophylaxis angles, should always be heat sterilized between patients and not high-level or surface disinfected.<sup>3</sup>

The Nupro Freedom™ Cordless Propphy Package includes 3 Autoclavable Outer Sheaths that have a fluid seal — providing a secure infection control barrier. Autoclavable Outer Sheaths replace the need to buy multiple handpieces to comply with Infection Prevention Guidelines and reduce equipment cost.

Disposa-shield® Disposable Polyethylene Barriers facilitate cleaning and protect the inner module from debris. Included in the Nupro Freedom Cordless Propphy Package.

Single-use Disposable Propphy Angles guarantee performance and accurate control of cup speed.

To request a demo, visit us at [nuprofreedom.com](http://nuprofreedom.com).

We asked real hygienists to try the Nupro Freedom Cordless Propphy System with SmartMode Technology. Here's what they had to say.

"I love how it automatically speeds up with pressure."

"I am a lot more in control."

"It is not putting weight on me that is causing my shoulder or my body to be out of alignment, which I love."

"Eliminating the foot pedal is a really awesome idea."

Lightweight balanced design and non-slip grip enhance comfort and control.

### Clinician comfort matters.

The cordless design eliminates cord drag, giving the handpiece a lightweight feel and increased maneuverability. It also reduces the wrist fatigue associated with cords and allows better access to posterior teeth. And with no foot pedal, there's less need to compromise your position while polishing.

### Patient comfort matters.

Nupro Freedom™ cordless handpiece is quieter than traditional air-driven hygiene or low-speed handpieces. And combined with Nupro Freedom® Slim Disposable Propphy Angles, it provides less chatter and vibration.

# For a better, safer, faster polishing procedure.

The Nupro® family of products offers hygiene handpieces, prophy angles, and a variety of pastes to deliver optimal performance and results.

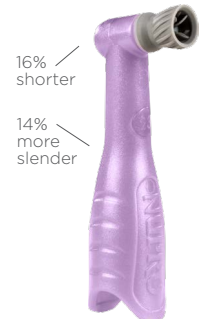

Nupro® Prophy Paste features excellent stain removal and polishing performance with 4 grits and 13 gluten-free flavors to satisfy almost any patient preference.

For hypersensitivity, Nupro® Extra Care Prophy Paste with Fluoride and NovaMin® is clinically proven to provide immediate sensitivity relief that lasts up to 28 days.

Nupro Freedom® Disposable Prophy Angles are available in a variety of cup options including:

Nupro Freedom® Slim Angles feature a 14% more slender neck, 16% shorter head<sup>4</sup> providing improved visibility and maneuverability.
