

THE POWER OF THE PROVISIONAL

INDIRECT RESTORATION  PROVISIONAL SOLUTION

SUCCESS STARTS WITH A

The path to restoration success and longevity begins with a strong start. DENTSPLY's provisional solution provides the right set of products and techniques to help ensure you achieve procedural efficiencies and optimal clinical success, while protecting office profitability.

Provisionals are an important element of crown and bridge restorations. Each successful execution supports your goals of final restoration longevity and patient satisfaction, while ensuring the full procedure remains one of the most profitable for the practice.

winning visit one.

From the preliminary impression to the provisional material and temporary cementation, visit one can lay the foundation for overall procedural success, resulting in:

- IDEAL CONDITIONS FOR HEALTHY TISSUE IN THE DEFINITIVE CEMENTATION VISIT
- FEWER PATIENT INTERIM VISITS DUE TO REPAIRS, ADJUSTMENTS, OR REMAKES
- LESS RISK OF PATIENT POSTTREATMENT SENSITIVITY
- MORE PREDICTABLE OUTCOMES

Winning visit two.

The provisional helps ensure patients return for their final crown and bridge seating appointment with optimal dental and tissue conditions for a surprise-free visit. Final fit, positioning, tissue contour, and tissue health are all directly impacted by visit one. Also, post-op sensitivity, patient comfort, masticatory function, and provisional esthetic qualities all play an important role in overall patient satisfaction and assessment of a clinician's skill.

DID YOU KNOW...

... 15 minute recement visit could cost more than \$114 (time & resources)¹

... 24% of an office's annual billable fees come directly from Crown & Bridge procedures²

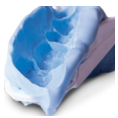

... Return visits for refrabrication could cost you as much as \$347 (time & resources)¹

BETTER PROVISIONAL SOLUTION

THE KEY TO A BETTER PROVISIONAL?
START WITH A BETTER LINEUP.

1. BUILD FROM AN ACCURATE MATRIX

To counteract the most common pitfalls like open margins, rough margins, bad contours, or poor occlusal contacts, **Algin-X™ Ultra** Alginate Alternative delivers high detail and dimensional stability to help ensure:

- Accurate anatomical contours
- Better provisional fit and positioning
- Homogenous mix with no dust or cleanup

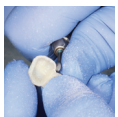

ALGIN-X™ ULTRA
Alginate Alternative

- HIGH-QUALITY ALGINATE REPLACEMENT VPS-BASED PRELIMINARY IMPRESSION MATERIAL
- 14-DAY DIMENSIONAL STABILITY
- FAST SET MATERIAL

2. CREATE A BETTER PROVISIONAL

Provisionals breaking and needing repairs do not need to be a part of the cost of doing business. **Integrity® Multi-Cure** Material helps remove the challenges of shrinkage and repairs:

- Provides strength sooner via light cure to minimize risk of trimming and adjusting prematurely
- Bonds to itself to easily add to or modify material
- Has minimal shrinkage for predictable restoration success

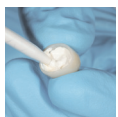

Integrity®
MULTI-CURE
Temporary Crown & Bridge Material

- HIGH STRENGTH SOONER VIA LIGHT CURE OPTION
- HIGHLY POLISHABLE TO HELP ENSURE FUTURE TISSUE HEALTH
- EASY TO ADJUST AND TRIM
- MRT AS EARLY AS 1'30"; TRIM & ADJUST 20" LATER VIA LIGHT CURE OPTION

3. CEMENT WITH THE END IN MIND

Set the tone for the rest of the procedure by choosing the right material. **Integrity® TempGrip®** Cement helps by:

- Simplifying clean up with no residual cement left behind
- Establishing an ideal environment for resin-based definitive cementation
- Avoiding desiccating the prepared tooth

Integrity®
TEMPGRIP®
Temporary Crown & Bridge Cement

- SIMPLIFY CLEANUP WHEN REMOVING PROVISIONAL
- LEAVES A CLEAN FIELD FOR EASIER DEFINITIVE CEMENTATION
- EXCELLENT ADHESION TO PROVISIONAL MATERIAL

SIMPLIFIED CLEANUP

Provisional at 2 weeks

Easy cleanup with Integrity TempGrip Cement

DID YOU KNOW...

... 75% of possible provisional pitfalls can derive from the preliminary impression?

... 10% of definitive cementation visits are impacted by temporary cement use?

... repairs and remakes can cost an office as much as \$900 or more a month in lost production?
